SITING COUNCIL**

Re: June 22 Site Visits

Dear Mr. Rinebold:

Below are the answers to the questions raised at the site visits on Monday, June 22, 1998.

1. Council wanted us to verify the height of the CL&P transmission tower in Wilton (Structure #2997). After reviewing the CL&P drawings I can confirm that the tower is 90 feet.
2. A question was raised about the ballast on the monopole transmission line in East Lyme (Structure #6076). The design shown as Exhibit D is the agreed upon design with Omnipoint and CL&P as the 4 foot ballast is a standard installation that meets the criteria of both CL&P and Omnipoint.
3. Council inquired about the power and telco design for the CL&P monopole structure in East Lyme (Structure #6076). It is standard procedure for Omnipoint to bring power and telco from the proposed utility pole underground to our BTS equipment.

If you have any questions, please feel free to call me at 203-855-5450.

It was nice meeting you and I look forward to working with you in the future.

Sincerely,

Brian Weinstein
Director of Site Acquisition
