

## TABLE OF CONTENTS (CONT.)

6.6.1	Description and Scoring of Potential Line Routes – Route Section 1 .....	6-18
6.6.2	Description and Scoring of Potential Line Routes – Route Section 2 .....	6-24
6.6.3	Noticed-Alternative Underground Line-Route Variation – Route Section 2 .....	6-30
6.6.4	Description and Scoring of Potential Line Routes – Route Section 3 .....	6-31
6.6.5	Noticed-Alternative Underground Line-Route Variation – Route Section 3 .....	6-37
6.6.6	Description and Scoring of Potential Line Routes – Route Section 4 .....	6-38
6.6.6A	Noticed-Alternative Underground Line-Route Variation – Route Section 4 .....	6-44A
6.6.7	Description and Scoring of Potential Line Routes – Route Section 5 .....	6-45
6.6.8	Description and Scoring of Potential Line Routes – Route Section 6 .....	6-50
6.6.9	Description and Scoring of Potential Line Routes – Route Section 7 .....	6-54
6.6.10	Noticed-Alternative Underground Line-Route Variation – Route Section 7 .....	6-61
6.6.11	Description and Scoring of Potential Line Routes – Route Section 8 .....	6-62
6.6.12	Description and Scoring of Potential Line Routes – Route Section 9 .....	6-68
6.7	Cost and Reliability Comparisons Among the Alternative 115-kV Routes .....	6-74

## SECTION 6 EXHIBITS .....

- Exhibit 6.1: Alternative Cross-Sections for 115-kV  
 Exhibit 6.2: Photographs along the 115-kV Underground Line Routes

## 7.0 COMPARISON OF OVERHEAD AND UNDERGROUND 115-kV FACILITIES .7-1

7.1	Review Methodology and Overview of Results .....	7-1
7.1.1	Summary .....	7-1
7.1.2	Overview of Reliability .....	7-5
7.1.3	Overview of Magnetic Field Level on Revised Overhead Line ROW and Underground Alternative Line Routes .....	7-6
7.2	Comparison of Alternative 115-kV Underground Line Routes with the Re-Building/Re- Conductoring of the Existing Overhead 115-kV Lines .....	7-15
7.2.1	Comparison of Alternative 115-kV Underground Line Routes with the Re- Building/Re-Conductoring of the Existing Overhead Line – Section 1 .....	7-16
7.2.2	Comparison of Alternative 115-kV Underground Line Routes with the Re- Building/Re-Conductoring of the Existing Overhead Line – Section 2 .....	7-30
7.2.3	Comparison of Alternative 115-kV Underground Line Routes with the Re- Building/Re-Conductoring of the Existing Overhead Line – Section 3 .....	7-44
7.2.4	Comparison of Alternative 115-kV Underground Line Routes with the Re- Building/Re-Conductoring of the Existing Overhead Line – Section 4 .....	7-56
7.2.5	Comparison of Alternative 115-kV Underground Line Routes with the Re- Building/Re-Conductoring of the Existing Overhead Line – Section 5 .....	7-69
7.2.6	Comparison of Alternative 115-kV Underground Line Routes with the Re- Building/Re-Conductoring of the Existing Overhead Line – Section 6 .....	7-80
7.2.7	Comparison of Alternative 115-kV Underground Line Routes with the Re- Building/Re-Conductoring of the Existing Overhead Line – Section 7 .....	7-93
7.2.8	Comparison of Alternative 115-kV Underground Line Routes with the Re- Building/Re-Conductoring of the Existing Overhead Line – Section 8 .....	7-107
7.2.9	Comparison of Alternative 115-kV Underground Line Routes with the Re- Building/Re-Conductoring of the Existing Overhead Line – Section 9 .....	7-119

## TABLE OF CONTENTS (CONT.)

7.3	Re-Building and Re-Conductoring Existing Overhead 115-kV Lines Along “Spurs” Intersecting the Existing Overhead 115-kV System on the Preferred Northern Route....	7-132
7.3.1	Cadwell Switching Station to Shawinigan Switching Station and Exit 6 Junction .....	7-136
7.3.2	Orchard Junction to Orchard Substation .....	7-149
7.4	Proposed 115-kV Ancillary Facility Construction and Modifications.....	7-158
7.4.1	Fairmont Switching Station .....	7-158
7.4.2	Cadwell Switching Station.....	7-166
7.4.3	South Agawam Switching Station .....	7-185
7.4.4	Piper Substation .....	7-189
7.4.5	Orchard Substation.....	7-193
7.4.6	Shawinigan Switching Station .....	7-197
7.4.7	Chicopee Substation.....	7-201
7.4.8	Breckwood Substation .....	7-205
7.4.9	115-kV Modifications at the Ludlow Substation .....	7-209
7.4.10	115-kV Modifications at the Agawam Substation .....	7-213

### SECTION 7 EXHIBITS.....

- EX. 7.1: Photographs along “Spur” Routes  
 EX. 7.2: Cadwell Switching Station Possible Construction Sequence

### 8.0 CONSISTENCY WITH THE CURRENT HEALTH, ENVIRONMENTAL PROTECTION, AND RESOURCE USE AND DEVELOPMENT POLICIES OF THE COMMONWEALTH.....8-1

8.1	Introduction.....	8-1
8.2	Health Policies .....	8-1
8.3	Environmental Protection Policies.....	8-1
8.4	Resource Use and Development Policies.....	8-6

### 9.0 PUBLIC OUTREACH.....9-1

9.1	Neighborhood Outreach.....	9-2
9.1.1	Business, Community and Civic Leaders/Groups .....	9-3
9.1.2	Environmental Groups .....	9-3
9.1.3	Communications During Construction .....	9-3

## GLOSSARY

**ATTACHMENT B**  
**CONNECTICUT SITING COUNCIL APPLICATION**  
**TABLE OF CONTENTS**

**VOLUME 1****I. APPLICATION**

<b>EXECUTIVE SUMMARY.....</b>	<b>ES-1</b>
ES.1 The Greater Springfield Reliability Project and Manchester to Meekville Junction Circuit Separation Project: Public Need and Objectives.....	ES-1
ES.1.1 Improvements to the Electric System of Greater Springfield.....	ES-2
ES.1.2 Contribution of the Greater Springfield Reliability Project and the Manchester to Meekville Junction Circuit Separation Project to the Overall New England East -West Solution.....	ES-4
ES.2 Overview of the Greater Springfield Reliability Project and the Manchester to Meekville Junction Circuit Separation Project.....	ES-5
ES.3 Proposed Location of the Greater Springfield Reliability Project and the Manchester to Meekville Junction Circuit Separation Project Facilities.....	ES-5
ES.3.1 Locations of Facilities.....	ES-5
ES.3.2 Overview of GSRP 345-kV Line Routes and Substation Facilities in Massachusetts and Connecticut.....	ES-6
ES.3.3 Description of Connecticut Segment of Proposed GSRP 345-kV Line Route and Substation.....	ES-7
ES.3.4 Overview of the Manchester to Meekville Junction Circuit Separation Project .....	ES-9
ES.4 Non-Transmission System Alternatives.....	ES-11
ES.5 Transmission Line Facility Alternatives.....	ES-11
ES.6 Routing Alternatives.....	ES-12
ES.6.1 Routing Alternatives for the 345-kV Line between the North Bloomfield Substation and the Connecticut/Massachusetts State Border.....	ES-12
ES.6.2 The Connecticut Portion of the Massachusetts Southern Route Alternative for a 345-kV Line between WMECO's Agawam and Ludlow Substations... ..	ES-18
ES.7 Line Design.....	ES-21
ES.8 Coordination of Massachusetts and Connecticut Siting Approvals.....	ES-21
ES.9 Environmental Effects.....	ES-22
ES.9.1 Connecticut Portion of the North Bloomfield to Agawam 345-kV and MMP Line Routes.....	ES-23
ES.9.2 Connecticut Portion of the Massachusetts Southern Route Alternative for the Agawam to Ludlow 345-kV Line.....	ES-28
ES.10 Cost.....	ES-31
ES.11 Schedule.....	ES-31

<b>A. PURPOSE</b> .....	<b>A-1</b>
<b>B. STATUTORY AUTHORITY</b> .....	<b>B-1</b>
<b>C. LEGAL NAME AND ADDRESS OF APPLICANT</b> .....	<b>C-1</b>
<b>D. APPLICANT'S CONTACT</b> .....	<b>D-1</b>
<b>E. BRIEF DESCRIPTION OF THE GSRP AND MMP</b> .....	<b>E-1</b>
E.1 Overview of the GSRP, Including the Preferred and Alternative Massachusetts Facilities.....	E-2
<b>E.2 Connecticut Portion of the GSRP and MMP</b> .....	<b>E-5</b>
E.2.1 GSRP Facilities .....	E-5
E.2.2 MMP Facilities.....	E-8
E.2.3 Modification of the 115-kV Ties at North Bloomfield .....	E-11
<b>E.3 Aerial Mapping</b> .....	<b>E-11</b>
<b>F. PROJECT BACKGROUND AND NEED</b> .....	<b>F-1</b>
F.1 Project Purpose and Overview .....	F-1
F.1.1 Background .....	F-1
F.1.2 The SNETR Study .....	F-8
F.1.3 The NEEWS Plan.....	F-10
F.1.4 Documentation of the Need for the NEEWS Plan and the Greater Springfield Reliability Project .....	F-13
F.2 The New England Bulk-Power Supply System .....	F-15
F.3 Bulk-Power Supply in Southern New England.....	F-19
F.4 The Existing Transmission System Serving Greater Springfield and Its Ties to North- Central Connecticut.....	F-20
F.4.1 Greater Springfield and North-Central Connecticut Area Generation Facilities .....	F-25
F.4.2 Summary of Reliability Deficiencies of the Greater Springfield 115-kV System and Their Impact on the Connecticut System.....	F-27
F.4.3 Objectives of the GSRP .....	F-28
F.4.4 The Manchester to Meekville Junction Circuit Separation Project.....	F-28
F.5 Description of Reliability Analysis.....	F-29
F.5.1 Initial and Updated Studies .....	F-29
F.5.2 Determination of Future Area Loads .....	F-29
F.5.3 Assumed Generator Availability.....	F-31
F.5.4 Regional Power-Transfer Limits.....	F-33
F.5.5 Modeling of Existing System with "All Lines In" .....	F-33
F.5.6 Contingency Analyses (N-1) and Results .....	F-33
F.5.7 Contingency Analyses (N-1-1) and Results .....	F-34
F.5.8 Power-Flow Analysis of the Transmission System as Improved By the GSRP Improvements.....	F-35
F.5.9 Conclusion of Reliability Analysis .....	F-35
F.6 Conformity of the Proposed Projects to a Long-Range Plan for Expansion of the Electric Power Grid.....	F-36
F.7 Status of the Other NEEWS Projects .....	F-37
F.8 In-Service Date .....	F-37

Appendix F-1: Load Forecast Data  
 Appendix F-2: Pre-GSRP N-1 Contingency List  
 Appendix F-3: Post-GSRP N-1 Contingency List

**G. SYSTEM ALTERNATIVES .....G-1**

G.1 Non-Transmission Alternatives ..... G-2

    G.1.1 No-Action Alternative..... G-2

    G.1.2 Resource Alternatives ..... G-2

    G.1.3 Background of ICF Resources LLC..... G-3

    G.1.4 ICF’s Characterization of the Problems..... G-3

    G.1.5 Summary of the ICF Study ..... G-4

        G.1.5.1 Alternatives Assessed..... G-4

        G.1.5.2 Key Assumptions for Alternatives..... G-5

        G.1.5.3 Power-Flow Model Development..... G-6

        G.1.5.4 Study Details..... G-8

        G.1.5.5 Study Results & Conclusion..... G-10

G.2 Alternate Transmission Solutions Considered but Rejected ..... G-16

    G.2.1 Identifying the North Bloomfield to Agawam to Ludlow Lines as the Best  
 345-kV Solution..... G-18

        G.2.1.1 Advantages of a 345-kV Connection to the Agawam Substation  
 ..... G-19

        G.2.1.2 Advantage of Avoiding Phase Shifters..... G-20

        G.2.1.3 Further Investigation of the Options..... G-20

**H. ALTERNATIVE GSRP LINE-ROUTE ANALYSES..... H-1**

H.1 Routing Objectives and Criteria..... H-3

    H.1.1 Routing Objectives..... H-4

    H.1.2 Overhead Line-Route Analysis Criteria..... H-5

    H.1.3 Underground Line Considerations and Route Analysis Criteria..... H-7

        H.1.3.1 Technological Considerations for Underground Transmission Lines  
 ..... H-7

        H.1.3.2 Underground Line-Route Analysis Criteria..... H-12

H.2 Route Analysis Process ..... H-14

H.3 Route Variations Considered but Eliminated..... H-16

    H.3.1 New ROW Variation: Underground or Overhead Transmission Configuration  
 ..... H-18

    H.3.2 Use of Highway Only Variations..... H-19

    H.3.3 All-Underground Cable Route Variation from North Bloomfield Substation to  
 Connecticut/Massachusetts State Border ..... H-20

        H.3.3.1 All-Underground Line Route Along CL&P’s Existing Overhead  
 Transmission Line ROW ..... H-23

        H.3.3.2 All-Underground Route Along or Adjacent to Existing Public  
 Roads ..... H-25

        H.3.3.3 All-Underground Line Routes - Conclusion..... H-26

H.4 Connecticut Portion of the North Bloomfield to Agawam 345-kV Line Route and  
 Potential Line-Route Variations..... H-26

    H.4.1 Connecticut Portion of the North Bloomfield to Agawam 345-kV Line Route  
 ..... H-31

- H.4.2 Potential Underground Line-Route Variations to Segments of the Connecticut Portion of the North Bloomfield to Agawam 345-kV Line Route..... H-37
  - H.4.2.1 Newgate Road Underground Line Route Variation: East Granby and Suffield..... H-38
  - H.4.2.2 State Route 168/187 Underground Line Route Variation: East Granby and Suffield..... H-41
  - H.4.2.3 4.6-Mile In-ROW Underground Line Route Variation: East Granby and Suffield..... H-43
  - H.4.2.4 3.6-Mile In-ROW Underground Line Route Variation: East Granby and Suffield..... H-46
- H.5 Underground Line Route Variation and Proposed Overhead Line Comparisons .... H-48
  - H.5.1 Summary of Rationale for Selecting the Proposed Overhead Transmission Line vs. the Underground Line Route Variations ..... H-48
    - H.5.1.1 Estimated Cost of Potential Underground Line Route Variations as Compared with the Overhead Line Section They Would Replace ..... H-49
    - H.5.1.2 Environmental Considerations in Overhead vs. Underground Line-Route Variation Comparisons..... H-50
    - H.5.1.3 Comparison of the Comparative Summary of the Proposed 345-kV Overhead Line and Underground Line Route Variations ..... H-52
- H.6 Connecticut Portions of the Massachusetts Southern Route alternative for the Agawam to Ludlow 345-kV Line..... H-54
  - H.6.1 Background of the Massachusetts Southern Route Alternative for the Agawam to Ludlow 345-kV Line..... H-54
  - H.6.2 Connecticut Portion of the Massachusetts Southern Route Alternative Overhead Line Configuration ..... H-56
  - H.6.3 Connecticut Portion of the Massachusetts Southern Route Alternative Underground Line Route Variation ..... H-57

Appendix H-1: Cost Comparison

- I. TECHNICAL DESCRIPTION OF PROPOSED FACILITIES ..... I-1**
  - I.1 Base Design of Proposed Connecticut Facilities for the GSRP ..... I-2
    - I.1.1 345-kV Conductor Sizes and Specification ..... I-2
    - I.1.2 Design and Appearance ..... I-2
      - I.1.2.1 Segment 1 (North Bloomfield - Granby Junction) –Cross-Section XS-1 in Volume 10..... I-2
      - I.1.2.2 Segment 2 (Granby Junction - CT/MA State Border) – Cross-Section XS-2 in Volume 10..... I-3
  - I.2 Base Design of Proposed MMP ..... I-5
    - I.2.1 Conductor Sizes and Specifications ..... I-5
    - I.2.2 Design and Appearance ..... I-5
      - I.2.2.1 Existing ROW and Facilities ..... I-5
      - I.2.2.2 Proposed MMP Facilities ..... I-6
  - I.3 Base Design of the Connecticut Portions of the Massachusetts Southern Route Alternative..... I-7
    - I.3.1 Conductor Sizes and Specifications ..... I-7
    - I.3.2 Design and Appearance ..... I-7
      - I.3.2.1 Segment 1 (CT/MA State Border – Connecticut River) – Cross-Section XS-S05 in Volume 10..... I-7

I.3.2.2 Segment 2 (Connecticut River - CT/MA State Border) – Cross-Section XS-S07 in Volume 10..... I-8

I.4 Line Configuration and Engineering Requirements..... I-9

I.4.1 Segments by Municipality ..... I-9

I.4.2 Initial and Design Voltages and Capacities ..... I-10

I.4.3 ROW and Access Way Requirements..... I-10

I.4.4 Proposed Structure Location Envelopes ..... I-13

I.4.5 Modification of North Bloomfield Substation ..... I-13

I.4.6 Service Areas Benefits ..... I-14

I.5 Estimated Project Costs..... I-15

I.5.1 Estimated Capital Cost of all GSRP Facilities, Connecticut and Massachusetts ..... I-15

I.5.2 Estimated Capital Cost of Connecticut Portion of GSRP Facilities..... I-15

I.5.3 Life-Cycle Cost ..... I-16

**J. CONSTRUCTION STEPS..... J-1**

J.1 Overhead Transmission Line Construction..... J-1

J.1.1 Overview of Overhead Line Construction ..... J-1

J.1.2 Material Staging Sites ..... J-3

J.1.2.1 Storage Areas..... J-4

J.1.2.2 Staging Areas..... J-4

J.1.2.3 Laydown Areas..... J-5

J.1.3 Construction Field Office..... J-6

J.1.4 Temporary Erosion and Sedimentation Controls ..... J-6

J.1.5 Vegetation Removal..... J-7

J.1.6 Access Roads ..... J-10

J.1.7 Foundation Work ..... J-12

J.1.8 Structure Installation ..... J-12

J.1.9 Conductor Work..... J-13

J.1.10 Cleanup and Restoration of ROW..... J-14

J.1.11 Special Procedures: Rock Removal (Blasting), Dewatering, Material Handling..... J-14

J.1.11.1 Blasting..... J-14

J.1.11.2 Soils and Groundwater ..... J-15

J.1.11.3 Soils Handling and Management..... J-17

J.1.11.4 Construction Site Dewatering..... J-18

J.2 Underground Transmission Line Construction ..... J-19

J.2.1 Overview of Underground Line Construction ..... J-19

J.2.2 Sequence of Underground Construction ..... J-19

J.2.2.1 Construction Within Roadways ..... J-19

J.2.2.2 Construction Within the ROW ..... J-22

J.2.3 Temporary Erosion and Sedimentation Controls ..... J-25

J.2.4 Vegetation Removal..... J-26

J.2.5 Splice-Vault Requirements ..... J-27

J.2.6 Special Procedures: Rock Removal (Blasting), Dewatering, Material Handling..... J-27

J.3 Transition Stations ..... J-28

J.4 Construction Procedure for Modification of the North Bloomfield Substation..... J-28

J.4.1 Overview of Substation Construction..... J-28

J.4.2 Site Preparation..... J-28

J.4.3	Foundations and Equipment.....	J-29
J.4.4	Testing and Interconnections .....	J-30
J.4.5	Final Cleanup, Site Security and Landscaping.....	J-31
J.5	Traffic Consideration and Hours of Operation .....	J-31

 ..... N-1

- N.1 Connecticut Portion of the North Bloomfield to Agawam 345-kV and MMP Overhead Line Routes ..... N-2

N.1.1	Topography, Geology, and Soils.....	N-4
N.1.2	Water Resources and Water Quality.....	N-8
N.1.2.1	Wetlands.....	N-9
N.1.2.2	Rivers and Streams.....	N-17
N.1.2.3	Groundwater Resources and Public & Private Water Supplies.....	N-20
N.1.3	Biological Resources.....	N-21
N.1.3.1	Wildlife and Vegetation.....	N-21
N.1.3.2	Wildlife Resources.....	N-23
N.1.3.3	Vegetation Management and Preservation Goals and Methods.....	N-24
N.1.3.4	Fisheries.....	N-27
N.1.3.5	Amphibians.....	N-27
N.1.3.6	Birds.....	N-29
N.1.3.7	Rare, Threatened, and Endangered Species.....	N-31
N.1.4	Land Use, Recreational/Scenic Resources, and Land Use Plans.....	N-37
N.1.4.1	Existing and Future Development.....	N-39
N.1.4.2	Open Space and Protected Areas.....	N-42
N.1.4.3	Methods to Prevent and Discourage Unauthorized Use of ROW.....	N-42
N.1.5	Transportation and Access.....	N-43
N.1.6	Cultural (Archaeological and Historic) Resources.....	N-44
N.1.7	Air Quality.....	N-45
N.1.8	Noise.....	N-46
N.1.9	North Bloomfield Substation Modifications.....	N-46
N.1.9.1	Geology, Topography, and Soils.....	N-47
N.1.9.2	Water Resources and Wetlands.....	N-47
N.1.9.3	Water Quality.....	N-48
N.1.9.4	Vegetation and Wildlife.....	N-49
N.1.9.5	Threatened, Endangered, and Special Concern Species.....	N-49
N.1.9.6	Land Use Plans and Existing/Future Development.....	N-49
N.1.9.7	Visual Resources.....	N-49
N.1.9.8	Transportation.....	N-50
N.1.9.9	Cultural Resources.....	N-50
N.1.9.10	Noise.....	N-50
N.2	Underground Variations for the North Bloomfield to Agawam 345-kV Line Route.....	N-51
N.2.1	Topography, Geology and Soils.....	N-51
N.2.2	Water Resources and Water Quality.....	N-55
N.2.3	Biological Resources.....	N-57
N.2.3.1	Wildlife and Vegetation.....	N-57
N.2.3.2	Fisheries.....	N-59
N.2.3.3	Amphibians.....	N-60
N.2.3.4	Birds.....	N-60
N.2.3.5	Rare, Threatened and Endangered Species.....	N-60
N.2.4	Land Use, Land-Use Plans, and Recreational/Scenic Resources.....	N-62
N.2.5	Transportation and Access.....	N-63
N.2.6	Cultural (Archaeological and Historic) Resources.....	N-64
N.2.7	Air Quality.....	N-65
N.2.8	Noise.....	N-65
N.2.9	Transition Stations.....	N-66
N.2.9.1	Granby Junction Transition Station Site.....	N-67
