RE: **DOCKET NO. 466** - The Connecticut Light & Power Company d/b/a Eversource Energy Certificate of Environmental Compatibility and Public Need for the Frost Bridge to Campville 115-kilovolt (kV) electric transmission line project that traverses the municipalities of Watertown, Thomaston, Litchfield, and Harwinton, which consists of (a) construction, maintenance and operation of a new 115-kV overhead electric transmission line entirely within existing Eversource right-of-way and associated facilities extending approximately 10.4 miles between Eversource's existing Frost Bridge Substation in the Town of Watertown and existing Campville Substation in the Town of Harwinton; (b) related modifications to Frost Bridge Substation and Campville Substation; and (c) reconfiguration of a 0.4 mile segment of two existing 115-kV electric transmission lines across the Naugatuck River in the Towns of Litchfield and Harwinton within the same existing right-of-way as the new 115-kV electric transmission line.

Dear Ms. Taylor:

Pursuant to Regulations of Connecticut State Agencies §16-50j-62 (b) and in response to your email of April 4, 2018, the Connecticut Siting Council (Council) staff hereby approves a change to the Development and Management (D&M) Plan for the above-referenced project to allow work at the Campville Substation on the following Sundays: April 22, April 29, and May 6, 2018. All work would be performed from 7 AM to 7 PM. These additional work hours are necessary to recover lost work time due to recent storm events and an associated re-scheduled outage sequence. Work is not expected to be classified as "noisy work", defined in Section 4.2 of the approved D&M Plan as work that requires the use of tri-axle equipment, vehicles with back-up alarms, and drilling activities. If noisy work is necessary, such work would be performed after 9 AM on Sundays. Notification to property abutters would occur prior to the commencement of Sunday work

This approval applies only to additional work hours requested in your email of April 4, 2018. Any additional changes to the D&M Plan require advance notification and approval in accordance with the Council's approval of the D&M Plan on September 15, 2016. Furthermore, the Certificate Holder is responsible for reporting requirements pursuant to Regulations of Connecticut State Agencies § 16-50j-62.

Please be advised that deviations from this plan are enforceable under the provisions of the Connecticut General Statutes §16-50u.

Thank you for your attention and cooperation.

Sincerely,

Melanie A. Bachman
Executive Director

Subject: Docket No. 466: Proposed Sunday Work at Campville Substation in April and May

RE: Docket No. 466: Frost Bridge to Campville 115-kV Project
Proposed Sunday Work at Campville Substation in April and May

Dear Melanie Bachman:

On February 8, 2018, the Connecticut Siting Council (Council) staff approved construction activities at Campville Substation from 7 AM to 7 PM, on four Sundays in March (March 4, 11, 18, and 25) and two Sundays in April (April 8 and 15). However, due to the multiple weather events that have occurred since the beginning of March, the original outage sequence has been delayed and rescheduled. As a result to complete the work at Campville Substation in accordance with the extended outage schedule, Eversource requests that the Council staff approval of the work at the substation, from 7 AM to 7 PM, on three additional Sundays: April 22, April 29, and May 6, 2018.

This Sunday work will be performed within the substation and is not expected to constitute "noisy work". (Noisy work, as defined for the Project by the Town of Harwinton and is typically work involving the use of tri-axle equipment, vehicles involving back-up alarms, and drilling). Eversource agreed that such noisy work would not commence before 9:00 AM on Sundays.

Eversource has notified the Town of Harwinton regarding the proposed work on the three additional Sundays and will provide sufficient notice to the abutters of Campville Substation prior to the performance of such work.

Please contact me with any questions or concerns.
