PUBLIC NOTICES

Notice of Application by The Connecticut Light and Power Company doing business as Eversource Energy for Approval of a New 115-kV Electric Transmission Line in the Municipalities of Bethel, Danbury, and Brookfield, Connecticut
Pursuant to the provisions of Section 16-501(b) of the General Statutes of Connecticut, Section 16-501(e) of the regulations of the Connecticut Siting Council, and the Application Guide for an Electric and Fuel Transmission Line Facility of the Connecticut Siting Council (adopted February 2016), notice is hereby given that The Connecticut Light and Power Company doing business as Eversource Energy (Eversource) will on or about June 30, 2016, submit an Application to the Connecticut Siting Council seeking a Certificate of Environmental Compatibility and Public Need (Application) for the Southwest Connecticut Reliability Project (Project).

The Project includes construction of a new approximately 3.4-mile 115-kilovolt (kV) overhead electric transmission line between Eversource's existing Plumtree Substation (located at 16 Walnut Hill Road in the Town of Bethel) and Brookfield Junction in the Town of Brookfield, related modifications to Plumtree Substation and Stony Hill Substation (located at 49 Stony Hill Road in the Town of Brookfield), and the reconfiguration of two existing 115-kV transmission lines that presently connect to Stony Hill Substation. All of the proposed Project facilities will be located within Eversource's existing, long-established right-of-way (ROW), which extends through portions of Bethel, Danbury, and Brookfield, or on Eversource-owned properties in those municipalities.

The Project is needed to bring the electric supply system in the Housatonic Valley-Norwalk-Plumtree electrical sub-area of Southwest Connecticut into compliance with national and regional reliability standards and criteria by eliminating potential thermal overloads and voltage violations identified in studies conducted by Independent System Operator-New England, the regional system planning authority.

The Application will describe the need for the Project; identify the proposed Project facilities; characterize the existing environmental conditions along the Proposed Route for the new 115-kV transmission line and at the Plumtree and Stony Hill substations; evaluate the Project's potential environmental and social impacts, along with measures to mitigate such impacts; and discuss the alternate routes and configurations considered for the new transmission line, including an evaluation of the environmental, engineering, reliability, operability, and cost considerations associated with those alternatives.

If approved by the Connecticut Siting Council, Project construction is expected to begin in the first quarter of 2018. The new transmission line is proposed to be completed and in-service by the end of 2018.

For further information about this Project, please visit www.Eversource.com, call 1-800-793-2202, or email TransmissionInfo@eversource.com.

NOTIFICATION OF AQUATIC TREATMENT NORTH SPECTACLE LAKE KENT, CT

North Spectacle Lake will be chemically treated to control nuisance aquatic vegetation on Monday, June 20, 2016. The lake will be closed to all water uses and water from treated portions of the lake should not be used (including swimming, boating and fishing) on the day of treatment only. Furthermore, water from the lake should not be used for irrigation for five (5) days from the date of treatment or until June 25, 2016.

The work is being performed for the North Spectacle Lake Association pursuant to permits (licenses) issued by CT DEEP. The work is being performed under contract with SOLitude Lake Management.

AFFIDAVIT REGARDING PUBLICATION OF LEGAL NOTICE

STATE OF CONNECTICUT)

) ss.

COUNTY OF HARTFORD)

Pursuant to Section 16-50(b) of the Connecticut General Statutes, I hereby certify that the attached tear sheets were received by the undersigned from the Danbury News-Times for legal notices that were published on June 10, 2016 and on June 16, 2016, in not less than ten-point, boldface type, setting forth the intent of The Connecticut Light and Power Company doing business as Eversource Energy (Eversource) to file with the Connecticut Siting Council an Application for a Certificate of Environmental Compatibility and Public Need for the Southwest Connecticut Reliability Project, which includes construction of a new approximately 3.4-mile 115-kilovolt (kV) overhead electric transmission line between Eversource's existing Plumtree Substation in the Town of Bethel and Brookfield Junction in the Town of Brookfield, related modifications to Plumtree Substation and Stony Hill Substation in the Town of Brookfield, and the reconfiguration of two existing 115-kV transmission lines that presently connect to Stony Hill Substation. These legal notices included a summary of the Application and the date on or about which it would be filed.

Samantha Cloutier – Project Outreach

On this the 27th day of June, 2016, before me, the undersigned officer, personally appeared Samantha Cloutier, known to be (or satisfactorily proven) to be the person whose name is subscribed to the within instrument and acknowledged that she executed the same for the purposes therein contained.

In Witness Whereof, I hereunto set my hand and official seal.

NOTARY PUBLIC
MY COMMISSION EXPIRES FEB. 28, 2021

NOTICE OF PROPOSED CONSTRUCTION OF A HIGH-VOLTAGE ELECTRIC TRANSMISSION LINE

Eversource Plans Improvements to Electric System to Maintain System Reliability

So that customers will have reliable electric power to meet their energy needs, we are continuing our efforts to improve Connecticut’s electric system in the Fairfield County towns of Bethel, Danbury, and Brookfield.

These proposed transmission system improvements, known as the Southwest Connecticut Reliability Project, are required to bring the electric supply system in southwest Connecticut into compliance with national and regional reliability standards. This notice provides a summary of our plan, as currently proposed.

Project Summary

To provide reliable, cost-effective and environmentally sound improvements to the regional electric transmission system, Eversource proposes to construct a new 3.4-mile 115-kilovolt (kV) overhead transmission line between its Plumtree Substation in Bethel (Walnut Hill Road) and Brookfield Junction in Brookfield (Park Ridge Road).

We also plan to make modifications at the Plumtree Substation to interconnect the transmission line. At Stony Hill Substation in Brookfield (Stony Hill Road), modifications will be made to the interconnection of an existing transmission line.

The new overhead line will be located entirely within Eversource’s existing transmission line rights-of-way.

Eversource plans to submit an application to the Connecticut Siting Council (Siting Council) within the next 60 days, seeking a “Certificate of Environmental Compatibility and Public Need” for this project. If approved by the Siting Council, construction is projected to begin in the first quarter of 2018. The new transmission line and related substation improvements are proposed to be completed and in service by the end of 2018.

Technical Description

The structure types under consideration for the overhead 115-kV transmission line are steel monopoles with heights ranging between 95 to 135 feet. Four three-pole horizontal structures approximately 30 to 40 feet in height are proposed to be placed to the west of Plumtree Substation.

Eversource’s application will provide additional siting and technical details, including information on how the specific design of the line impacts magnetic field levels and measures to minimize magnetic fields. The proposed new lines will meet the requirements of the Siting Council’s “Best Management Practices for Electric and Magnetic Fields,” as amended.

Project siting and magnetic field information, including calculated magnetic field levels, will be included in the application. A link to the application will be available on the project’s website at eversource.com, and on the Siting Council’s website at www.ct.gov/csc. Paper copies will be available at libraries in the towns along the project route. Additional information about the project can be obtained by calling 1-800-793-2202 or by emailing TransmissionInfo@eversource.com. Additional information on electric and magnetic fields may be obtained by calling 1-800-793-2202 or contacting the Connecticut Department of Public Health at 860-509-7740.

Proposed Route Under Consideration

The proposed line route for the new 115-kV transmission line will extend approximately 3.4 miles on existing rights-of-way, between Plumtree Substation and Brookfield Junction in the towns of Bethel, Danbury and Brookfield.

The proposed line route exits the Plumtree Substation and extends approximately 3.4 miles in a northerly direction along existing rights-of-way, crossing Plumtrees Road, Payne Road, Interstate 84, Berkshire Boulevard, and Park Lawn Drive before ending at the Brookfield Junction, which is off Park Ridge Road.

Project Location Map Southwest Connecticut Reliability Project

The map above depicts the proposed route of the overhead transmission line in Bethel, Danbury and Brookfield.

AVISO DE PROPUESTA DE CONSTRUCCIÓN DE UNA LÍNEA DE TRANSMISIÓN ELÉCTRICA DE ALTA TENSIÓN

Eversource Planea Mejoras en el Sistema Eléctrico Para Mantener la Fiabilidad del Sistema

Para que los clientes cuenten con un sistema eléctrico confiable que cubra sus necesidades energéticas, continuamos con nuestros esfuerzos para mejorar el sistema eléctrico de Connecticut en las ciudades de Bethel, Danbury y Brookfield del condado de Fairfield.

Estas propuestas de mejoras en el sistema de transmisión, conocidas como el Proyecto de Fiabilidad de Southwest Connecticut, son necesarias para que el sistema de suministro eléctrico del sudoeste de Connecticut cumpla con las normas de fiabilidad regionales y nacionales. Este documento contiene un resumen de nuestro plan, según la propuesta actual.

Resumen del Proyecto

Para ofrecer mejoras confiables, rentables y seguras para el medioambiente en el sistema de transmisión eléctrica regional, Eversource propone construir una nueva línea de transmisión eléctrica aérea regional de 115 kilovoltios (kV) a lo largo de 5.47 km (3.4 millas) entre su subestación Plumtree ubicada en Bethel (Walnut Hill Road) y Brookfield Junction en Brookfield (Park Ridge Road).

También planeamos realizar modificaciones en la subestación Plumtree para interconectar la línea de transmisión. En la subestación Stony Hill de Brookfield (Stony Hill Road), se realizarán modificaciones en la interconexión de una línea de transmisión existente.

La nueva línea aérea estará ubicada por completo dentro de la servidumbre de paso de la línea de transmisión existente de Eversource.

Eversource planea presentar una solicitud al Consejo de Emplazamiento de Connecticut dentro de los próximos 60 días para obtener un “Certificado de Compatibilidad Ambiental y Necesidad Pública” para este proyecto. Si es aprobado por el Consejo de Emplazamiento, la construcción está pautada para comenzar el primer trimestre de 2018. La nueva línea de transmisión y las mejoras en la subestación relacionada están planeadas para finalizarse y entrar en funcionamiento a fines de 2018.

Descripción Técnica

Los tipos de estructuras evaluados para la línea de transmisión aérea de 115-kV son de monopostes de acero con alturas que varían entre los 29 y 41 metros (95-135 pies). Se propone colocar cuatro estructuras horizontales de tres postes de aproximadamente 9 a 12 metros de altura (30-40 pies) al oeste de la subestación Plumtree.

La solicitud de Eversource incluirá otros detalles técnicos y de emplazamiento, tales como datos sobre cómo el diseño específico de la línea afectará los niveles y medidas de campos magnéticos para minimizar los campos magnéticos. Las líneas nuevas propuestas cumplirán con los requisitos del Consejo de Emplazamiento respecto de las “Buenas Prácticas de Manejo de Campos Magnéticos y Eléctricos,” según lo enmendado.

La solicitud contendrá información sobre el emplazamiento del proyecto y el campo magnético, que incluirá los niveles calculados de los campos magnéticos. Podrá encontrarse un enlace de la solicitud en el sitio web del proyecto en eversource.com, y en el sitio web del Consejo de Emplazamiento en www.ct.gov/csc. También podrán obtenerse copias en papel en las bibliotecas de las ciudades por las que pasa el proyecto. Puede obtenerse más información sobre el proyecto llamando al 1-800-793-2202, o enviando un correo electrónico a TransmissionInfo@eversource.com. Respecto a información sobre campos magnéticos y eléctricos, puede llamar al 1-800-793-2202 o comunicarse con el Departamento de Salud Pública de Connecticut al 860-509-7740.

Trayecto Propuesto en Consideración

El trayecto propuesto para la nueva línea de transmisión de 115-kV abarcará aproximadamente 5.47 km (3.4 millas) en la servidumbre de paso existente, entre la subestación Plumtree y Brookfield Junction en las ciudades de Bethel, Danbury y Brookfield.

El trayecto propuesto para la línea parte de la subestación Plumtree y se extiende aproximadamente 5.47 km (3.4 millas) en dirección norte a lo largo de la servidumbre de paso existente; cruza Plumtrees Road, Payne Road, la ruta interestatal 84, Berkshire Boulevard y Park Lawn Drive antes de finalizar en Brookfield Junction, pasando Park Ridge Road.
