Immunization Program

TO: All CVP Providers
FROM: Mick Bolduc 
Vaccine Coordinator-Connecticut Vaccine Program (CVP)
DATE: August 2, 2021
SUBJECT: Update on Seasonal Flu Vaccine Availability

The purpose of this communication is to notify you of the availability of seasonal flu vaccine.

Pediatric Influenza Vaccine

The Advisory Committee on Immunization Practices (ACIP) recommends that all children aged 6 months through 18 years be vaccinated yearly against influenza. For the 2021–22 flu season the CVP will only be supplying Quadrivalent vaccines licensed for use. The full 2021 Influenza Vaccine Recommendations will soon be available at: www.cdc.gov/mmwr.

The Immunization Program will provide several different formulations of vaccine available to immunize **all children aged 6 months through 18 years of age regardless of insurance status**.

Currently GSK's FluLaval® is available to order. Please review expected availability of other flu products in box below. Please limit your vaccine request to your actual need for the current month. The majority of our influenza vaccine supply is expected to be available by late September/mid-October. To avoid vaccine wastage be sure to order only what you need for the current month and not for the entire flu season. Since providers can order as often as they like the CVP encourages providers to order smaller quantities of flu vaccine several times during the course of a month.
