Immunization Program

TO: All CVP Providers
FROM: Mick Bolduc 
Vaccine Coordinator-Connecticut Vaccine Program (CVP)
DATE: February 6, 2020
SUBJECT: Influenza Formulations for 2020-21 Flu Season

The primary purpose of this communication is to inform you of the influenza formulations the Connecticut Vaccine Program (CVP) will be providing during the 2020-21 flu season.

Influenza Formulations

For the 2020-21 flu season the CVP will be providing influenza vaccine for all children 6 months through 18 years of age regardless of insurance status. All vaccines offered will be quadrivalent preservative-free formulations.

As soon as influenza vaccine becomes available (likely sometime in August) you will be notified that you can begin placing your flu orders. We will do our best to fill the orders as completely as possible but the majority of influenza vaccine is not expected to be available until September and October.

We have included a list of the flu formulations we will be supplying this upcoming influenza season. As a reminder both GSK's FluLaval[®] and Sanofi's Fluzone[®] are now licensed for administration to patients 6 months of age and older so the CVP will not be offering any .25mL influenza formulations.
